Customer Notification

Subject: Potential Shortages due to Steris Illinois and Viant Closure

Because of the shutdown of the Sterigenics Willowbrook facility and Viant Grand Rapid Michigan (Sterigenics contracted Sterilization Facility), all types of sterile devices manufactured by Hobbs Medical, Inc. that are required to undergo an ethylene oxide process at Steris in the near future can be affected by these closures. At this time, Hobbs Medical, Inc. sterile devices have not been affected, but we started to assess potential downstream impacts of the closures on device sterilization.

Every effort is being taken to prevent a potential shortage, we're monitoring the situation closely, and we are working together with Sterigenics to limit the impact of device supply interruptions. Please feel free to contact either of us, if additional information is required.

Kind regards;

Carlos
